

MJ-L165

LED LIGHTING SYSTEM

The best value for your money.

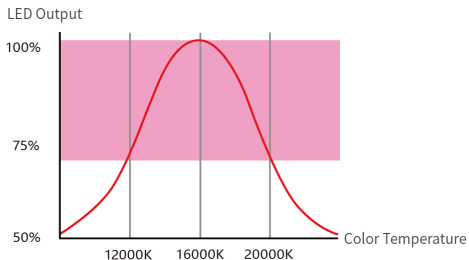

One System, Multiple Spectrums

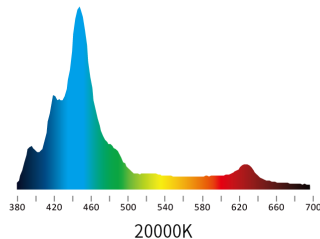

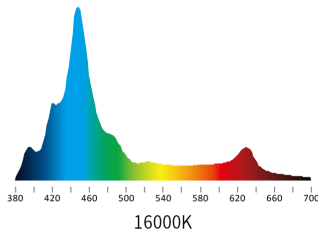

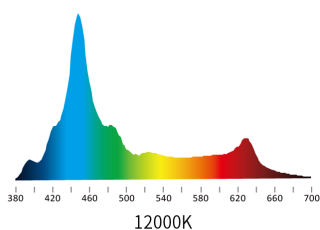

Full-Spectrum with Multi-Phase Color Temperature Technology

With our proprietary technology, the L165 LED lighting system can be easily reconfigured to different color spectrums without sacrificing performance!

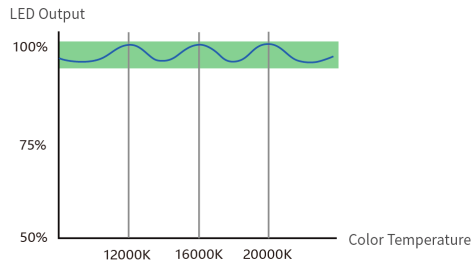

- Other LED systems sacrifice up to 40% of their performance when adjusting to other color temperature

Other LED systems with default color at 16000K

- Maxspect Jump L165 LED operates at between 95-100% (between 62-65w) of maximum efficiency between color profiles

Maxspect Jump L165 LED operating at different color profiles

Syna-G Cloud Smart Aquarium System

The all-new Syna-G Cloud platform allows you to remote control your LED system around the world

Moonlight with Automated Lunar Cycle

Profile Library allows easy access and sharing of setting profiles

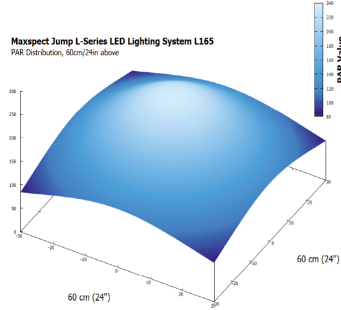

Acclimation schedule for your corals to adapt to the new light
